Questions for discussion:

People use NEAR searches all the time, even if they do not think of them as such. Does that mean that people should learn them, just as they learn to search in “ “ for exact results? Or is it enough that these types of searches are implemented?

Advanced Search

Find pages with...

To do this in the search box

all these words:

Type the important words: tricolor rat terrier

this exact word or phrase:

Put exact words in quotes: "rat terrier"

any of these words:

Type OR between all the words you want: miniature OR standard

none of these words:

Put a minus sign just before words you don't want:
-rodent, -"Jack Russell"

numbers ranging from:

to

Put 2 periods between the numbers and add a unit of measure:
10..35 lb, \$300..\$500, 2010..2011

Then narrow your results
by...

language:

any language ▼

Find pages in the language you select.

region:

any region ▼

Find pages published in a particular region.

last update:

anytime ▼

Find pages updated within the time you specify.

site or domain:

Search one site (like `wikipedia.org`) or limit your results to a domain like `.edu`, `.org` or `.gov`

terms appearing:

anywhere in the page ▼

Search for terms in the whole page, page title, or web address, or links to the page you're looking for.

[SafeSearch](#):

Show most relevant results ▼

Tell [SafeSearch](#) whether to filter sexually explicit content.

file type:

any format ▼

Find pages in the format you prefer.

[usage rights](#):

not filtered by license ▼

Find pages you are free to use yourself.
